Education

Vellore Institute of Technology

Bachelor of Technology in Computer Science and Engineering (AI & ML)

2023 – 2027

CGPA: 8.39/10.0

Relevant Coursework

- | | | | |
|-------------------------------|----------------------------|----------------------|------------------------|
| • Database Management Systems | Algorithms | • Business Analytics | • Statistical Learning |
| • Data Structures & | • Probability & Statistics | • Data Visualization | • Data Mining |
| | • Data Warehousing | • Machine Learning | • SQL Programming |

Projects

E-Commerce Sales & Logistics Analytics | PostgreSQL, SQL, Power BI, DAX, DirectQuery

May 2026

- Designed and normalized a **9-table relational database** in PostgreSQL for a Brazilian e-commerce dataset containing **100K+ orders**, enforcing referential integrity through foreign-key relationships across customers, orders, products, sellers, and payments.
- Engineered **4 optimized SQL views** to deduplicate review records, derive delivery performance metrics, and consolidate transactional data into an analysis-ready fact table.
- Developed **15+ DAX measures** in Power BI using DirectQuery to monitor revenue, Average Order Value (AOV), Year-over-Year growth, rolling 30-day trends, on-time delivery rate, and customer review sentiment.
- Delivered an **8-page interactive dashboard** featuring executive KPIs, sales, customers, products, logistics, reviews, payments, and seller analytics with drill-through capabilities.
- Identified logistics bottlenecks and seller revenue concentration through trend analysis, supporting data-driven logistics optimization and seller performance decisions.

Food Delivery Business Performance Dashboard | Power BI, DAX, Power Query, Data Modeling

April 2026

- Constructed a **4-table star schema** from a **200K-row** food delivery dataset using Power Query to standardize inconsistent restaurant categories and city records.
- Created **20+ DAX measures** to analyze revenue, Average Order Value (AOV), delivery performance, cancellation rate, and time-intelligence metrics including Year-to-Date and Month-over-Month growth.
- Implemented repeat-customer cohort analysis using DAX iterator functions (**FILTER**, **VALUES**) to measure customer retention and purchase frequency.
- Generated calculated columns for restaurant segmentation based on pricing and customer ratings, enabling comparative performance analysis across business categories.
- Published a **5-page interactive Power BI report** with drill-down navigation, slicers, and cross-filtering for city, restaurant, and customer-level analysis.

Technical Skills

Programming Languages: SQL, Python

Data Analysis: Exploratory Data Analysis (EDA), Data Cleaning, Data Wrangling, Cohort Analysis, KPI Design, Statistical Analysis

Business Intelligence: Power BI, DAX, Power Query (ETL), DirectQuery, Star Schema, Dashboard Development, Data Visualization

Databases: PostgreSQL, MySQL, Relational Database Design, Views, Indexes, Constraints, Foreign Keys

SQL: Joins, Window Functions, Common Table Expressions (CTEs), Aggregate Functions, Query Optimization

Reporting: Interactive Dashboards, Drill-Through Reports, Cross-Filtering, Interactive Slicers, Stakeholder Reporting

Developer Tools: Microsoft Excel, Git, GitHub, VS Code, pgAdmin, Jupyter Notebook

Leadership / Extracurricular

Gujarati Club, VIT

2023 – 2025

Coordinator

VIT

- Led one of VIT Bhopal's largest cultural communities by organizing Garba Night with **5,000+ participants**.
- Oversaw **150+ volunteers** across marketing, sponsorships, logistics, ticketing, and crowd management, ensuring seamless event execution.
- Spearheaded multiple cultural initiatives that enhanced student engagement, cross-functional collaboration, and campus participation.
