Education

Vellore Institute of Technology

2023 – 2027

Bachelor of Technology in Computer Science and Engineering (AI & ML)

CGPA: 8.39/10.0

Relevant Coursework

- Data Structures Algorithms
- Object-Oriented Programming
- Database Management Systems
- Web Technologies
- Operating Systems
- Computer Networks
- Software Engineering
- Artificial Intelligence

Projects

SnapCart | *Next.js, React.js, TypeScript, MongoDB, Redux Toolkit, Socket.IO, Razorpay* **April 2026**

- Engineered a scalable grocery delivery platform featuring dedicated dashboards for customers, administrators, and delivery partners using Next.js, TypeScript, MongoDB, and Mongoose.
- Architected **27 RESTful API endpoints** and **12 responsive pages** supporting authentication, inventory, cart management, order processing, checkout, and payment workflows.
- Enabled real-time order tracking and in-app messaging through Socket.IO, Leaflet, Geolocation APIs, and automated **10 km** radius-based delivery assignment.
- Secured user access with NextAuth.js, Google OAuth, credentials authentication, JWT sessions, and Role-Based Access Control (RBAC).
- Integrated Razorpay payment gateway with server-side verification, cash-on-delivery support, OTP-based delivery confirmation, and automated email notifications.
- Streamlined application state using Redux Toolkit while designing scalable MongoDB schemas, Cloudinary media storage, and Gemini AI-powered quick replies.

Rydex | *Next.js, React.js, TypeScript, MongoDB, Redux Toolkit, Socket.IO, Razorpay* **April 2026**

- Developed a full-stack vehicle rental and ride-booking platform with separate dashboards for users, partners, and administrators.
- Constructed **43 RESTful API endpoints** and **15 production-ready pages** covering vehicle discovery, reservations, KYC verification, payments, ride tracking, and real-time messaging.
- Delivered live vehicle tracking and instant messaging using Socket.IO, Leaflet, GeoJSON queries, and nearby vehicle discovery within a **10 km** radius.
- Configured secure authentication with NextAuth.js, Google OAuth, credentials login, JWT-based sessions, and role-based access control (RBAC).
- Integrated secure payment processing with Razorpay using HMAC verification, **10%** commission distribution, partner earnings management, and OTP-based pickup/drop verification.
- Modeled **6 MongoDB collections** supporting an **8-step** partner onboarding workflow, Cloudinary uploads, ZegoCloud video KYC, Redux Toolkit state management, and Gemini AI-powered responses.

Technical Skills

Languages: Java, JavaScript, TypeScript, SQL, HTML5, CSS3

Frontend: React.js, Next.js, Redux Toolkit, Tailwind CSS

Backend: Node.js, RESTful APIs, NextAuth.js, JWT Authentication, Role-Based Access Control (RBAC), Socket.IO

Databases: MongoDB, Mongoose

Cloud & APIs: Google OAuth, Gemini API, Cloudinary, Razorpay, Geolocation API

Developer Tools: Git, GitHub, VS Code, Postman, npm

Leadership / Extracurricular

Gujarati Club, VIT

2023 – 2025

Coordinator

VIT

- Led one of VIT Bhopal's largest cultural communities by organizing Garba Night with **5,000+ participants**.
- Oversaw **150+ volunteers** across marketing, sponsorships, logistics, ticketing, and crowd management, ensuring seamless event execution.
- Spearheaded multiple cultural initiatives that enhanced student engagement, cross-functional collaboration, and campus participation.
