Projects

ShopSphere — Full-Stack E-Commerce Platform

July 2026

Python, Django, Django REST Framework, React.js, Tailwind CSS, SQLite, JWT

- Built a full-stack e-commerce platform using **Django REST Framework** and React.js with authentication, cart, checkout, and order management.
- Designed **6 relational models** and developed **11 REST APIs** for authentication, products, cart, and orders using Django ORM.
- Implemented secure **JWT authentication** with SimpleJWT, protected APIs, and custom user registration with validation.
- Developed complete cart and checkout workflows with automatic total calculations, order creation, and cash-on-delivery support.
- Built a responsive React frontend using Context API, Tailwind CSS, and protected routing for authenticated users.

DevConnector — Social Network for Developers

August 2026

Python, Django, Django REST Framework, React.js, Redux, SQLite, Token Authentication

- Developed a developer networking platform using Django REST Framework and React with authentication, profiles, posts, comments, and social interactions.
- Designed **6 relational models** and implemented **15 REST API endpoints** for authentication, profiles, education, experience, posts, likes, and comments.
- Implemented DRF Token Authentication, profile management, CRUD operations, and GitHub API integration for displaying user repositories.
- Built a Redux-powered frontend dashboards, profile management, post feeds, comments, and protected routing.
- Integrated Gravatar avatars, GitHub repository lookup, reusable serializers, and optimized Django ORM relationships for efficient data retrieval.
